DNA test for pituitary dwarfism

The DNA of the German shepherd dog

Mascani Ikon

born 20-10-2010, registration no. AJ05130001

Transpondernr./Identification code 968000004475611

was tested for the presence of the gene mutation that causes pituitary dwarfism in this breed. The test result showed that the dog is clear of the mutation.
